

GITAM

SCHOOL OF ARCHITECTURE

SCHOOL OF ARCHITECTURE

GITAM School of Architecture aims to be an architecture school of excellence driven by culture, context, and compassion for building inclusive and agile human habitats.

- Foster a progressive learning environment by promoting critical thinking for designing context-specific built environments.
- Impart multidisciplinary research aptitude through a curriculum based on social responsibility, sustainable built environment, cultural context, and evolving technologies.
- Nurture valuable futures by providing exposure to best practices across the world.
- Sensitize students to universal human values through a culture of empathy and ethics in articulating spaces.

We are committed to delivering architecture education of global standards through reflective teaching and research. Architects are not merely designers of buildings; they are the creators of spaces that shape our world. With this vision at the core of our institution, we aim to empower visionary minds eager to redefine spaces and inspire curiosity in the next generation of architects.
